Invoices – VAT (Tax Rate)

# France -VAT

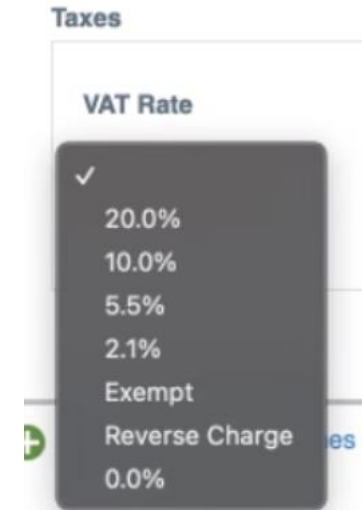

- Suppliers must ensure that when processing invoices the correct Mitie company VAT registration is selected: FR801018466 (Buyer VAT ID field)
- The invoice produced by Coupa is the Supplier's legal invoice, so it is important that suppliers ensure the correct VAT Rate is selected so that the correct Tax Code is determined and applied. Where required, an additional statement is included on the invoice for certain supplies that are not subject to VAT, or require Mitie to self-account for French VAT.
- Coupa is designed to capture supplies that are subject to differing VAT treatments. These are:
  - Domestic
  - Intra-EU
  - Cross-border (Non-EU / Rest of World).
- Suppliers are often required to include a statement on a tax invoice to clarify why no VAT is being charged. Coupa provides suppliers with the ability to enter a VAT Rate and subsequently populate the "Tax Reference" using a short code. When the supplier inputs the short code, such as "ZR" for Zero Rated, all tax references associated with the "ZR" short code are displayed and can be selected. This feature allows suppliers to ensure that the correct legal statement is included on an invoice.
- In France, the options for "VAT Rate" in the dropdown menu are:
  - 20%, 10%, 5.5%, 2.1%, 0.0%, Exempt and Reverse Charge.
- Further guidance is provided for each type of supply, the associated Tax Rates, and additional legal statements required to be included on Coupa VAT invoices.
- Submission Blockers will guide you to select a Tax Reference for the required legal statements
